

In close cooperation with global market leader in detergents Diversey, GI-OVO has drawn up advice on which detergents can be used to optimally clean the EggsCargoSystem® without causing damage to the system or the environment.

Part of the advice is the use of disinfectants that can be used to minimize contamination. This advice in combination with the possibility to provide the EggsCargoSystem® with a bio security additive contributes to the maximum safe use of the EggsCargoSystem® between all companies in the chain.

To read Diversey's advice, go to: www.gi-ovo.com
