

ECS

EGGS CARGO SYSTEM®

USE THE ECS® PALLET PLUG FOR MAXIMUM GRIP

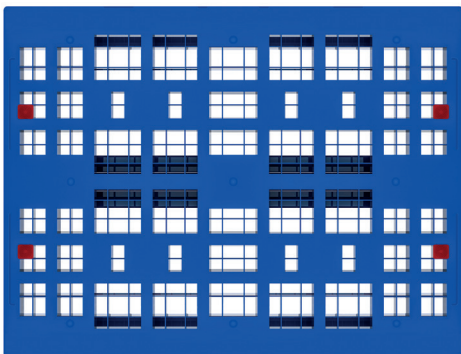

The EggsCargoSystem® pallet is the best performing egg pallet available in the market. Nevertheless, there are particular situations where the stacks can shove, which may lead to avoidable egg crack:

- Extreme bad road conditions
- Unexpected braking by the truck or forklift
- Not horizontally (un)loading of the pallets with eggs

NEW

For these situations we created the **EggsCargoSystem® Pallet-Plug**.

By applying this plug to the pallet shoving will be reduced to a minimum. We can deliver separate plugs as well as pallets with integrated plugs.
